

SERVIDEMIC

A solution for individuals to connect and offer help based on their skills, location, and availability. Facilitates growth by encouraging individuals to serve and support their community through structured opportunities. Designed to accommodate a growing user base with a robust infrastructure.

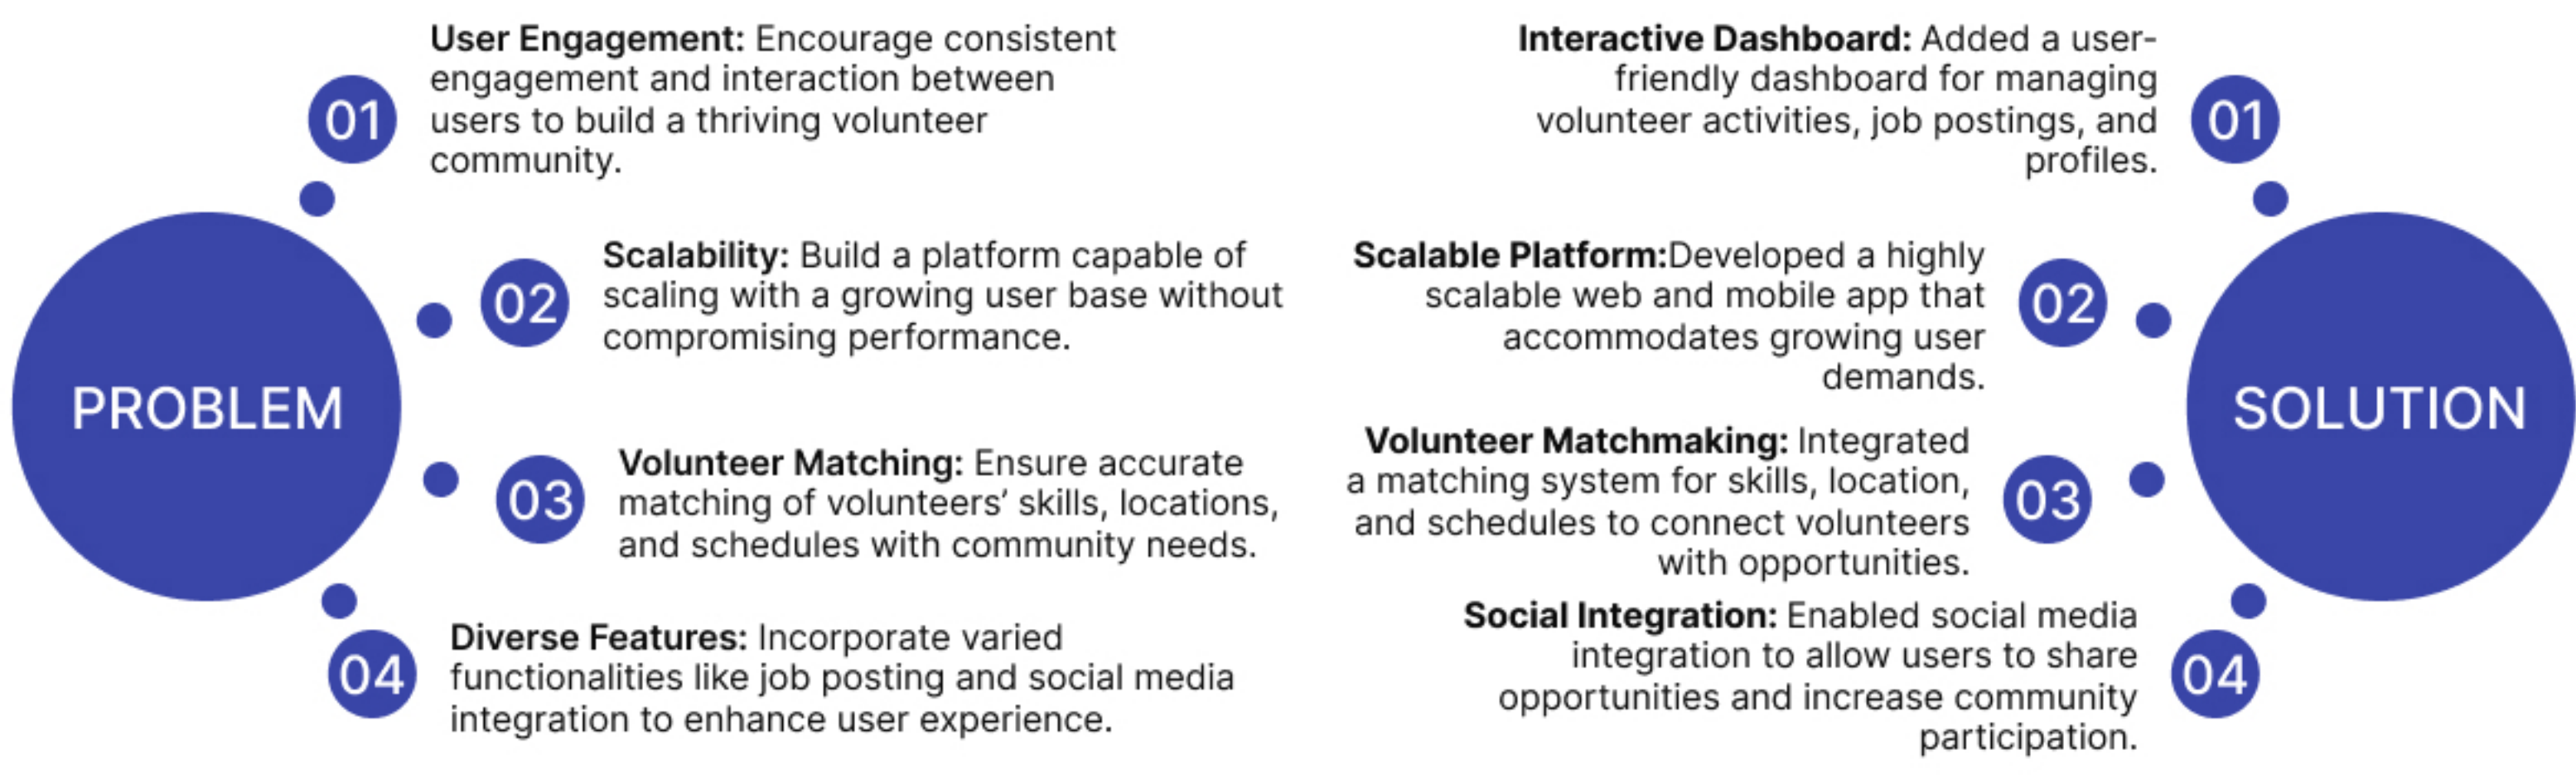

Platform	Industry
Mobile	Social Networking

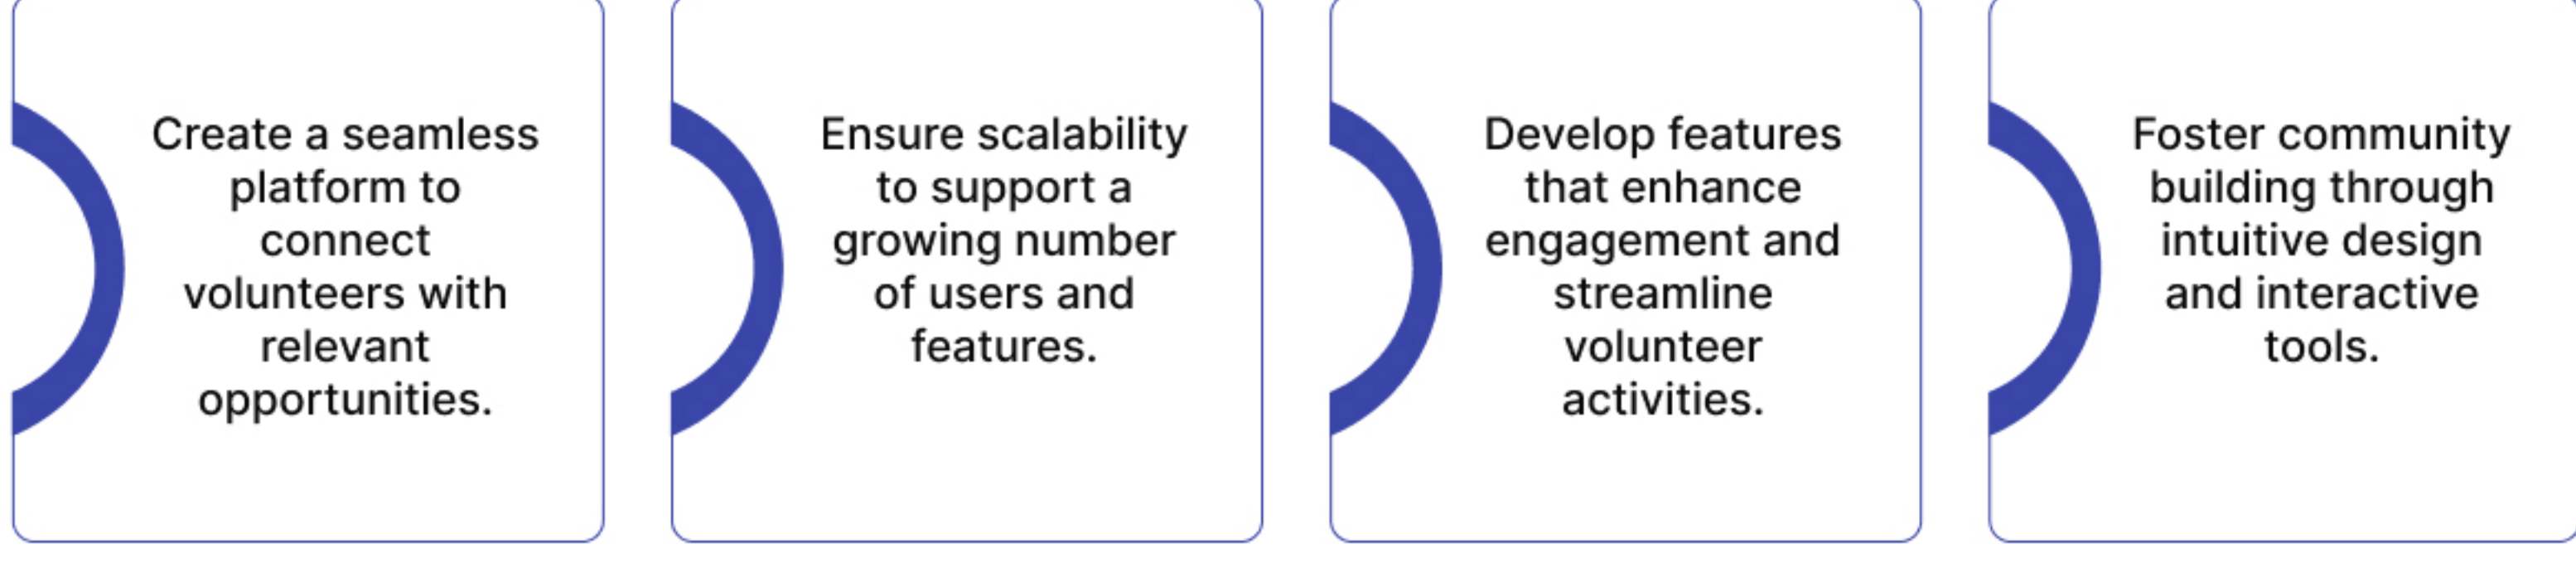

— Summary

Servidemic is a scalable web and mobile platform that connects volunteers with those in need by matching them based on skills, location, and availability. It features account creation, job postings, social media integration, dashboards, and map-based matching to facilitate community impact.

— Problem VS Solution

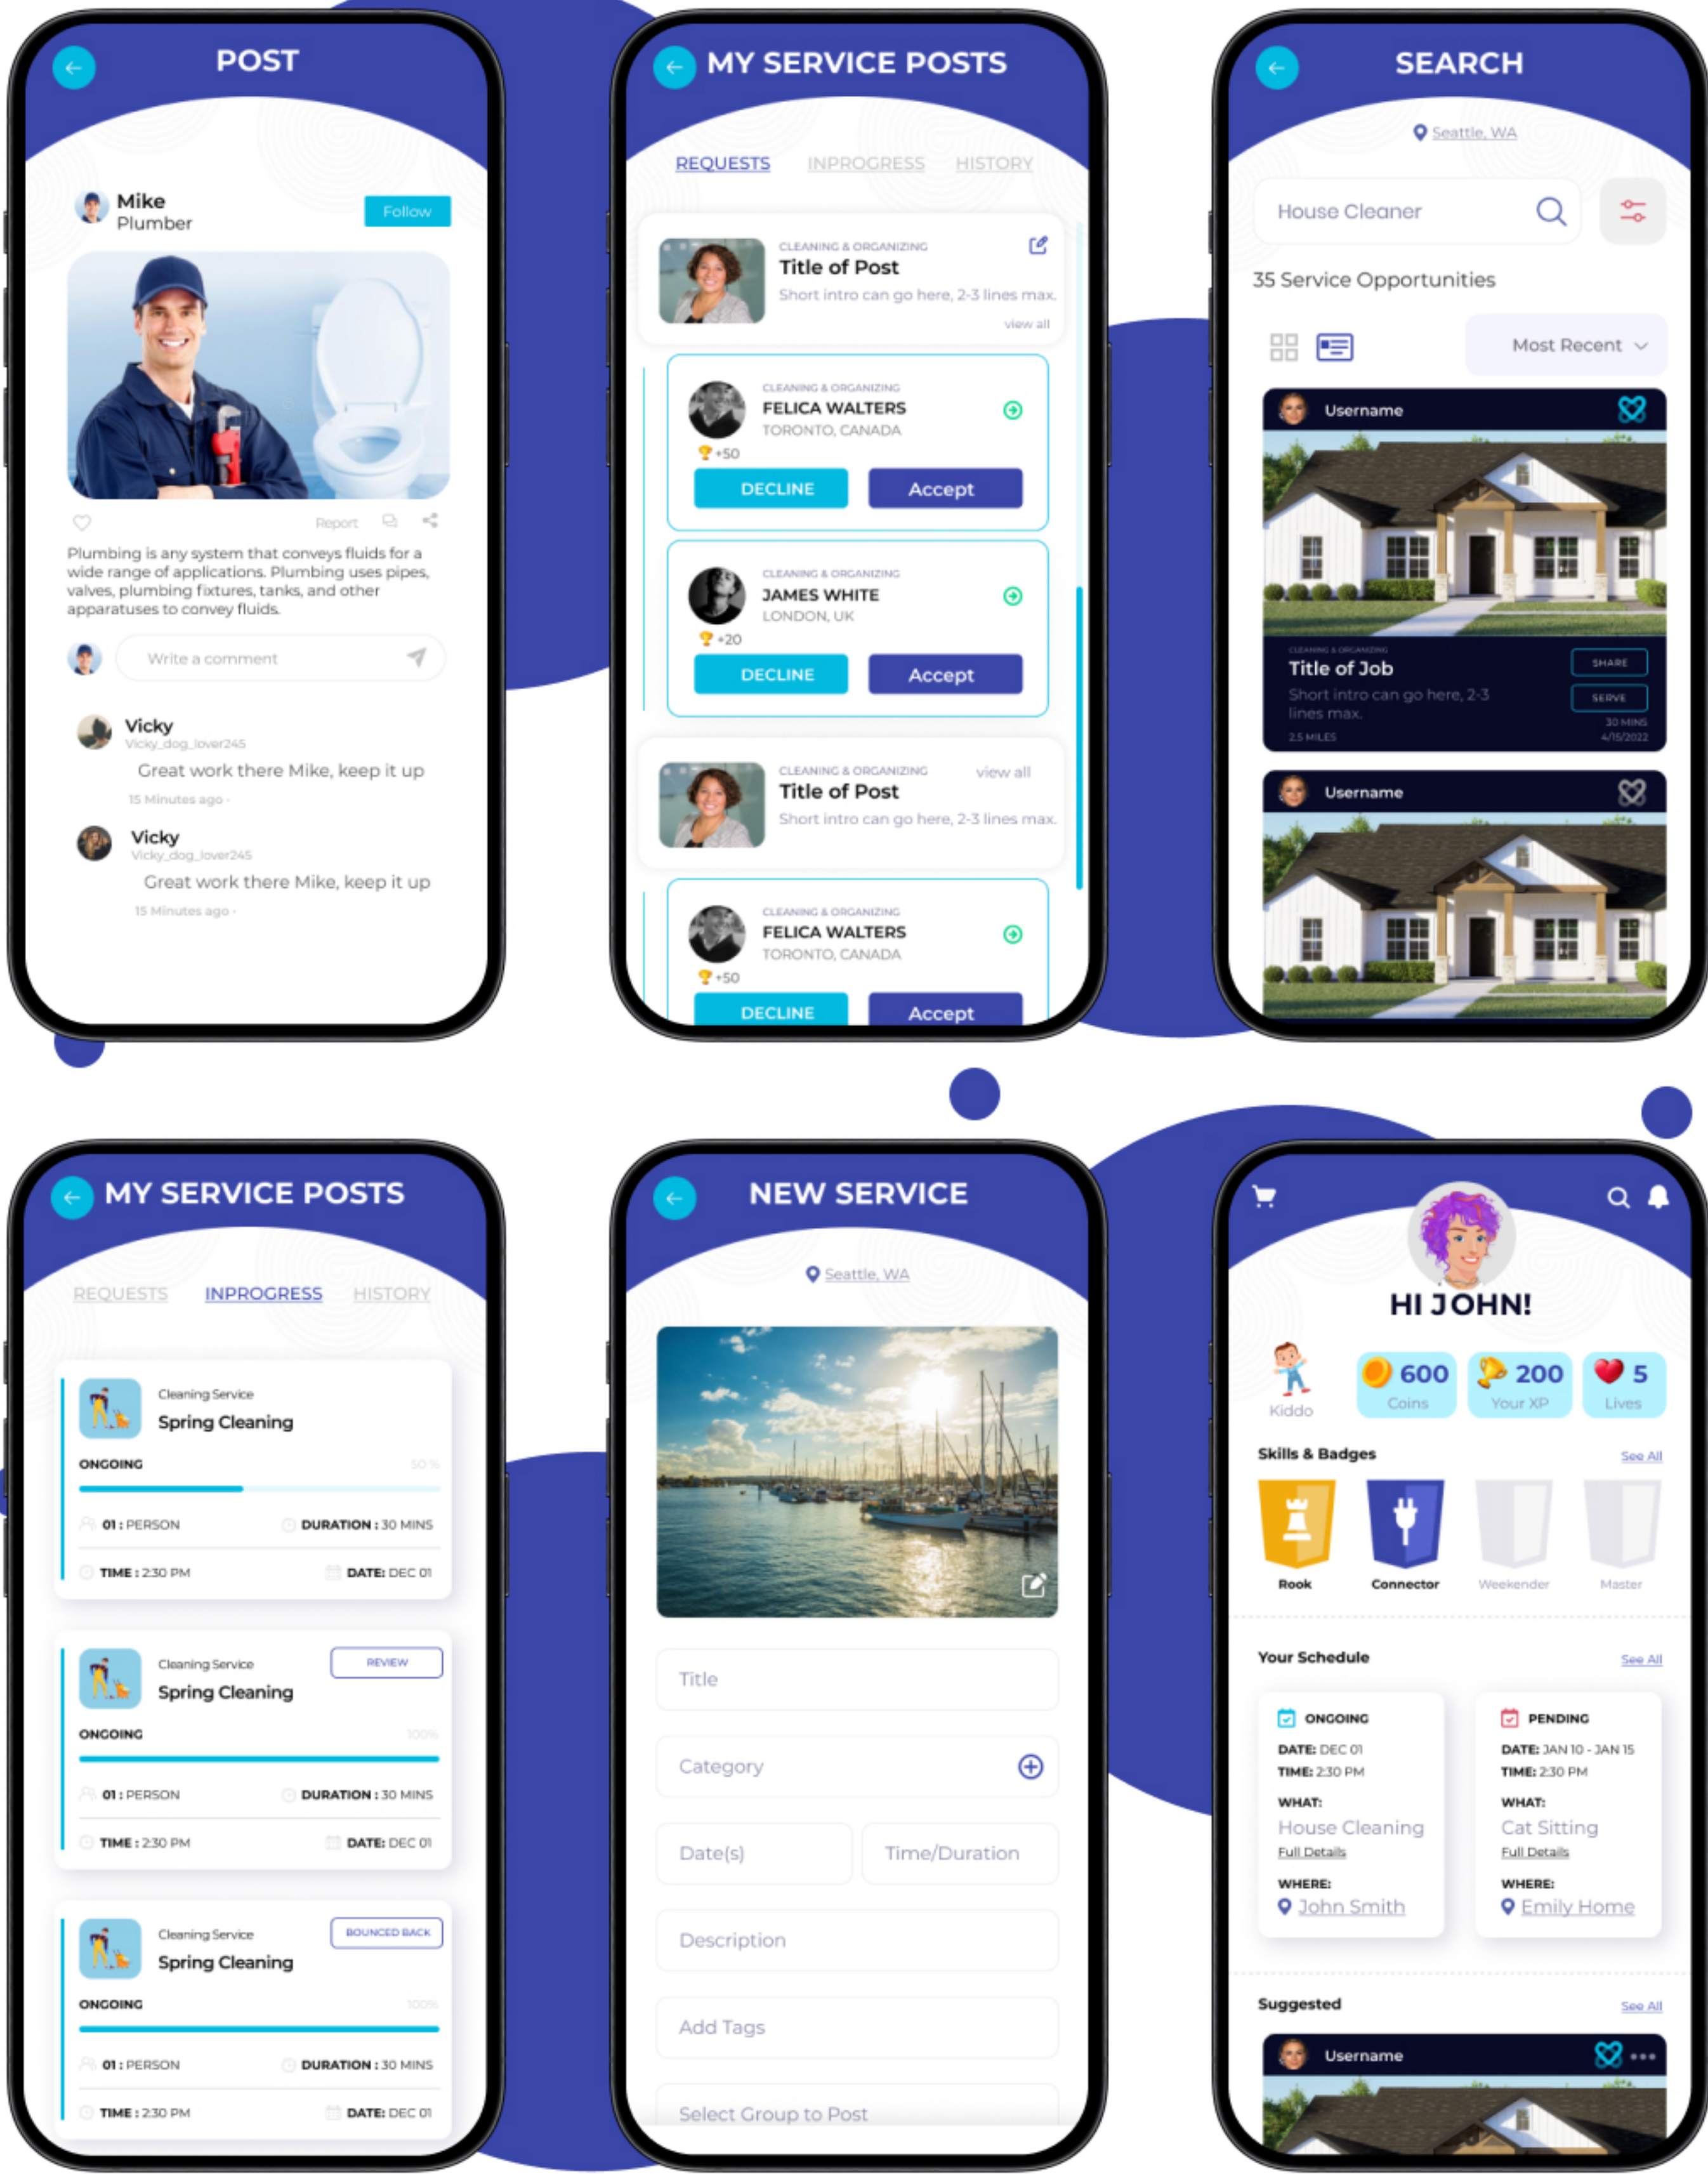

— Project Goals

— Purpose

Servidemic aims to provide a scalable, user-friendly platform where individuals can volunteer their skills and time to help others. It fosters community collaboration by matching volunteers with opportunities, enabling them to grow together while serving their community.
